Smart Lightweight Closures for Standard Bottles

Designed to reduce material use while maintaining full functionality and quality. Optimized design reduces plastic use and CO₂ emissions across the supply chain.

WELCOME!

SHB GmbH – Packaging with Vision and Responsibility

SHB GmbH is a family-owned company with over 30 years of experience in the development and distribution of innovative plastic packaging. Today, SHB is managed in the second generation by Kim-Nadine Stolle and Jens-Olaf Stolle – driven by a clear commitment to continuously rethink and improve high-quality packaging solutions.

What began in 1991 with technical products for the mining industry has evolved into an internationally active provider offering over 100 bottle series and more than 60 closure variants. This results in more than 5,000 possible combinations, enabling maximum flexibility and perfectly tailored solutions.

Whether standard products or custom designs with a high recognition value – our packaging is created in close collaboration with our customers, from the initial idea to the ready-for-production solution. Our focus lies on quality, sustainability, and a strong orientation towards the market and our customers.

You'll find our innovative packaging solutions everywhere – from well-known drugstore chains to supermarket shelves. Chances are, you've already held a product with our packaging in your hands.

For our commitment to resource-saving materials and processes, we were honored in 2023 with the Business Award of the City of Crailsheim for outstanding sustainability.

SHB Packaging – Think Global. Act Local.

less weight **MORE IMPACT**

New lightweight versions of proven SHB closures.

-
- **Reduced in material usage** •
 - **Optimized in design** •
 - **Unchanged in performance** •
-

Our new lightweight closures combine the best of two worlds:
 maximum resource efficiency and 100% functionality.

i The patented DELTA Adapters are one of SHB's new developments. These adapters are compatible with all SHB DELTA bottles. It is easily fitted and converts the snap-on bottle neck to a standard screw thread. This means that for example a soap can be added to an existing bottle range without any additional costs.

**FROM
YOUR
FIRST
IDEA**

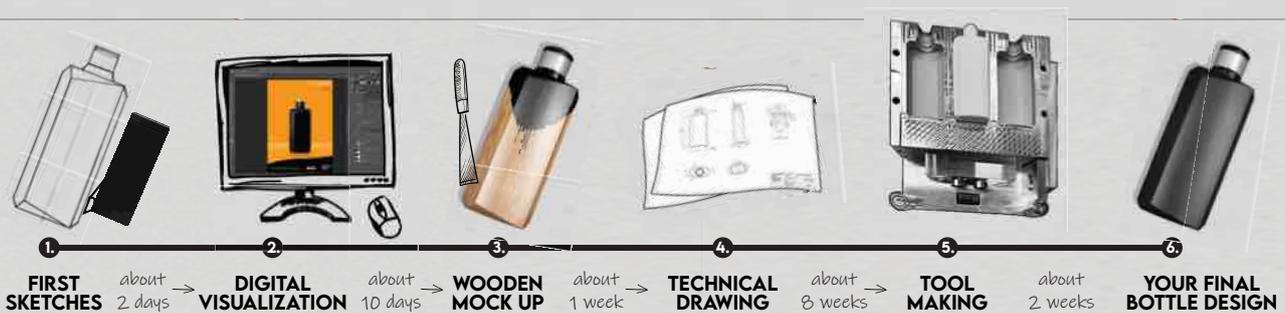

**TO
YOUR
BOTTLE
DESIGN**

SIX STEPS TO TURN YOUR IDEA INTO REALITY

1. Idea and first sketches in about 2 days.
2. First sketches and digital mock up in 48 hours.
3. Digital mock up getting into a physical wooden model in 10 days.
4. Transforming wooden model into a technical drawing in about 1 week.
5. From the release of the technical drawing to the finished tool in 8 weeks.
6. Finished tool to production in about 2 weeks.

SHA01

Patented Angled Neck Adapter for Toilet-Cleanerbottles

The concept of a WC adapter has been developed and patented over many years. The new SHA Adapter, is available as of now for angle-necked bottles in HDPE and PET.

Use of this adapter greatly simplifies the manufacture and filling of angle-necked bottles.

- Simplified bottle production on conventional blow moulding machines
- Standard upright filling of the bottles on conventional filling machines
- The combination of the adapter and the KISI closure can be snapped on in an upright position just like a regular closure

We currently offer this concept for our standard bottles in HDPE and PET in 500ml, 750ml and 1000ml sizes. If you are looking for your own design for a bottle like this, we are your competent partner in its development.

Follow us
